

arena Plaver

Vertical interior partitions and party walls

Description

Semi-rigid panels of ISOVER **arena** mineral wool, non-hydrophilic, without coating. Designed to achieve the highest thermal and acoustic performance in buildings.

Applications

Due to its excellent thermal and acoustic performance, the ISOVER **arena** range is the best option for insulating vertical interior partitions and party walls, especially those made of brick.

Advantages

- Excellent solution for refurbishment. Developed for the thermal and acoustic insulation of party walls.
- Large and lightweight panels; thanks to their dimensions, they increase performance on site. It covers the distance between floors, offering excellent thermal and acoustic insulation with a minimum thickness.
- Sustainable product made with more than 50% recycled material. 100% recyclable material.
- Inert material that is not a suitable medium for the development of microorganisms.
- Maintains the performance of the system unchanged throughout the life of the building; they do not degrade over time.
